## SUMMARY

Final-year student with a strong interest in implementation strategies, management, and industrial development in results-driven consulting organizations. I am motivated by taking on new challenges and look forward to contributing my skills. I appreciate a workplace that combines exciting challenges with opportunities for personal growth.

## EDUCATION

### Linköping University

Master of Science- MS, Industrial Engineering and Management, minor: Innovation Management 2023 - Ongoing  
(Includes courses in Project Management, Operations Strategy, Lean, and Innovation and Change Management)  
(Additional courses in Finance, Cybersecurity, and AI)

### Linköping University

Bachelor of Science- BS, Construction engineering 2020 - 2023  
(Included courses in Mathematics, Statistics, Leadership and Organization, Construction Calculations, and CAD courses)

## WORK EXPERIENCE

### Area Coordinator and Apartment Inspector

June 2023 – Ongoing

Stångåstaden AB - Largest rental property company in Östergötland

Linköping, Sweden

- Handled administration and planning of property management to ensure customer orders and needs in home maintenance and repairs were met. Worked closely with customers to fulfill their needs and maintain good relationships.
- Conducted thorough inspections of over 40 apartments, reviewing safety and maintenance standards in detail. Collaborated with a supervisor on approximately 20 additional inspections to identify areas for improvement and ensure all apartments met established standards.

### Teaching Assistant in Steel Structures

Sep 2023 - Oct 2023

Linköping University

Norrköping, Sweden

- Mentored and provided guidance to a class of 30 students in calculations for steel structures, where I took a leading role both during lectures and lab sessions. Ensured that each student received the support and guidance needed to understand complex calculations and apply them practically in their assignments.
- Developed strong skills in project planning and effective communication by actively leading and communicating with the students, creating a clear structure, and fostering positive results in their work.

## STARTUP EXPERIENCE

### Co-founder and CEO

June 2024 - Ongoing

Catalina Software Solutions AB

Stockholm, Sweden

- Project 1:* Developed an Excel VBA calculation template for automatically and accurately calculating depreciation and charges related to apartment inspections, streamlining the process and reducing billing errors.
- Project 2:* Developed a web application for AI generation of policies for sports clubs in Sweden, featuring account management, email reminders, and digital signatures. The application was primarily developed with Next.js and python, as well as Tailwind CSS with a PostgreSQL database.

## COMMITTEE ACTIVITIES

### Business Development and Sponsorship Contact

Jan 2024 - Ongoing

LIU Formula Student

Linköping, Sweden

- Contributed to the development of a Next.js/Python system for managing the Bill of Materials (BOM) for the components in the formula car and played a key role in creating a business strategy as part of the cost and business team.
- Strengthened collaboration with existing sponsors and actively worked to attract new sponsorships, leading to the team's highest-ever sponsorship revenue of approximately 400,000 SEK.

## INTERESTS AND OTHER SKILLS

**Programs:** Excel VBA, Next.js, React, Python, TailwindCSS, Typescript

**Languages:** Swedish and English

**Interests:** Gym, football, and golf
